25 an image creating section which creates a thumbnail of a display image of the registering home page in its entirely.

30

3. The information processing apparatus as claimed in claim 1, further comprising:

a summarizing section which creates a summary of the contents of the registering home page from the contents of the registering home page.

35

4. The information processing apparatus  
as claimed in claim 1, further comprising:

a list creating section which creates a list of  
URLs of linking destinations included in the  
registering home page.

10 5. The information processing apparatus  
as claimed in claim 1, further comprising:

15 a page analyzing section which analyzes an  
inspection record of home pages to obtain an  
analyzed result, and outputs information of a home  
page which is being inspected with a display order  
or display format dependent on the analyzed result.

20 6. The information processing apparatus  
as claimed in claim 1, further comprising:

25 a HTML creating section which creates a HTML  
file and outputs the HTML file when starting a  
browser, so as to output a home page having a high  
inspection frequency with a priority over others  
based on an inspection record of home pages.

30 7. The information processing apparatus  
as claimed in claim 1, further comprising:

35 a scrap information storage which stores an  
arbitrary specified portion of the registering home  
page.

8. A computer-readable storage medium which stores a program for causing a computer to realize a bookmark registration function for registering a home page which is being inspected,  
5 said program comprising:

a procedure causing the computer to extract keywords from contents of a registering home page which is to be registered; and

10 a procedure causing the computer to create a title of the registering home page from the extracted keywords, and to add the title to the registering home page.

15

9. The computer-readable storage medium as claimed in claim 8, wherein said program further comprises a procedure causing the computer to create  
20 a thumbnail of a display image of the registering home page in its entirely.

25

10. The computer-readable storage medium as claimed in claim 8, wherein said program further comprises a procedure causing the computer to create a summary of the contents of the registering home  
30 page from the contents of the registering home page.

35

11. The computer-readable storage medium as claimed in claim 8, wherein said program further comprises a procedure causing the computer to create

a list of URLs of linking destinations included in the registering home page.

5

12. An information processing apparatus comprising:

10       a keyword extracting section extracting keywords from contents of a home page; and  
          a title creating section creating title information of the home page using the extracted keywords.

15

13. A computer-readable storage medium which stores a program for causing a computer to 20 realize the processes of:

extracting keywords from contents of a home page; and  
creating title information of the home page using the extracted keywords.

25

14. An information processing method for 30 registering a home page which is being inspected, comprising the steps of:

(a) extracting keywords from contents of a registering home page which is to be registered; and  
          (b) creating a title of the registering home 35 page from the extracted keywords, and adding the title to the registering home page.
